Camera + Door Graph · Printable Construction Sheet

Purpose: lock the cinematic travel graph before we build additional WalkMyPlan geometry. The router remains the authority; doors and cameras are choreography.

Door	From	To	Route	Role	Entry	Destination	Animation	Status
main-door	BACKYARD	MAIN HALL	index.html	public	ARR-01	H-01	door-open-enter	PLANNED
login-door	MAIN HALL	LOGIN ROOM	login.html	public	H-01	L-01	door-open-enter	PLANNED
register-door	LOGIN ROOM	REGISTER ROOM	register.html	public	L-01	R-01	door-open-enter	PLANNED
profile-door	MAIN HALL	PROFILE SUITE	profile.html	authenticated	H-01	P-01	door-open-enter	PLANNED
market-door	MAIN HALL	MARKET	market.html	owner,seeker,broker	H-01	M-01	door-open-enter	PLANNED
broker-hq-door	PROFILE SUITE	BROKER HQ	broker-hq.html	broker	P-12	B-01	door-open-enter	PLANNED

legal-door	MAIN HALL	REFERENCE	privacy.html terms.html	public	H-09	LGL-01	door-open-enter	PLANNED
admin-door	MAIN HALL	OPERATIONS	admin.html	admin	H-01	A-01	door-open-enter	PLANNED

Universal Cinematic Transition Contract

1. Intent
2. Exit confirmation only when appropriate
3. Freeze nonessential interaction
4. Exit camera
5. Exit door opens
6. Prepare route and destination
7. Load destination room/hero
8. Destination door opens
9. Entry camera settles on hero
10. Restore interaction

Guardrails: 3D failure must not block navigation. Reduced motion uses a short fade/minimal transform. Authorization happens before entry. Do not create a second cinematic router.
